Location: Addis Ababa, Ethiopia  
Telephone: +251981564073  
Email: abebetigabu90@gmail.com

## SUMMARY

---

Computer Science graduate with a CGPA of 3.98/4.00 and recipient of the First Rank Academic Excellence Award (Cup and Certificate). Experienced in developing full-stack web applications using the MERN stack, with practical experience in building systems that automate institutional processes. Proficient in JavaScript, React.js, Node.js, Express.js, MongoDB, REST APIs and JWT-based authentication. Strong foundation in software development, problem-solving, database-driven applications and responsive web interfaces, with a commitment to producing reliable and maintainable solutions.

## EDUCATION

---

**B.Sc. (Bachelor of Science in Computer Science),** Debre Tabor University  
**Academic Achievement:** CGPA 3.98/4.00; First Rank Academic Excellence Award (Cup and Certificate)

## TECHNICAL EXPERTISE

---

- **Programming Languages:** JavaScript, Java, Python, C++
- **Web Technologies:** HTML5, CSS3, React.js, Node.js, Express.js, REST APIs
- **Database:** MongoDB, MySQL
- **Authentication:** JWT, Role-Based Authentication and Authorization
- **Frontend:** React.js, Tailwind CSS, Responsive Web Interfaces
- **Backend:** Node.js, Express.js, RESTful API Development
- **Development Tools:** VS Code, Postman
- **Version Control:** Git, GitHub

## EXPERIENCE DETAILS

---

### Software Development Internship, Debre Markos University ICT Center

- Developed greater confidence in learning independently, debugging problems and completing application development tasks with limited supervision.
- Strengthened practical skills in software development by translating project requirements into functional web application features and improving my understanding through hands-on development.
- Applied the guidance received during the internship to the development of my software projects, while independently researching, practicing and solving implementation challenges.
- Gained practical experience in web application development while working with and receiving technical guidance from experienced members of the Software Team at the ICT Center.

## PROJECT DETAILS

---

## **Project #1: Student Department Placement System (MERN Stack)**

**Role:** Full-Stack Developer

A full-stack web application designed to automate the placement of university students into academic departments based on institutional placement criteria, student preferences, academic performance and department capacity.

### **Responsibilities:**

- Designed and implemented an automated student placement algorithm based on academic performance, preferences and department capacity.
- Developed secure role-based authentication and authorization for administrators using JWT.
- Built responsive administrative dashboards for managing students, departments and placement operations.
- Developed RESTful APIs using Express.js for communication between frontend and backend.
- Implemented bulk student data import from spreadsheet files for efficient processing of large datasets.
- Automated placement operations to reduce manual effort and improve consistency and accuracy.

**Environment:** React.js, Node.js, Express.js, MongoDB, JavaScript, JWT, Tailwind CSS

## **Project #2: Student Complaint Management System (MERN Stack)**

**Role:** Full-Stack Developer

A web-based complaint management system that enables students to submit, track and manage complaints digitally.

### **Responsibilities:**

- Developed frontend and backend components for digital complaint submission and management.
- Implemented RESTful API endpoints for complaint-related operations.
- Implemented JWT-based authentication for secure access.
- Designed database-driven functionality using MongoDB.

**Environment:** React.js, Node.js, Express.js, MongoDB, JavaScript, JWT
